

# ENA – THE SMART CHOICE

## Any coffee you choose

With an ENA machine, you can use any type of fresh coffee beans you like. Whether you go for the exclusive blend from your local roaster or a special-offer multipack, the ENA is designed to get the optimum enjoyment out of any blend or roast.

## Selectable coffee strength

Like all JURA bean-to-cup automatics, the ENA also features the patented variable-volume brewing unit, which prepares between 5 and 16 grams of coffee under ideal conditions. An advantage you can taste, cup after cup after cup.

ENA<sup>5</sup>

### Technical Data

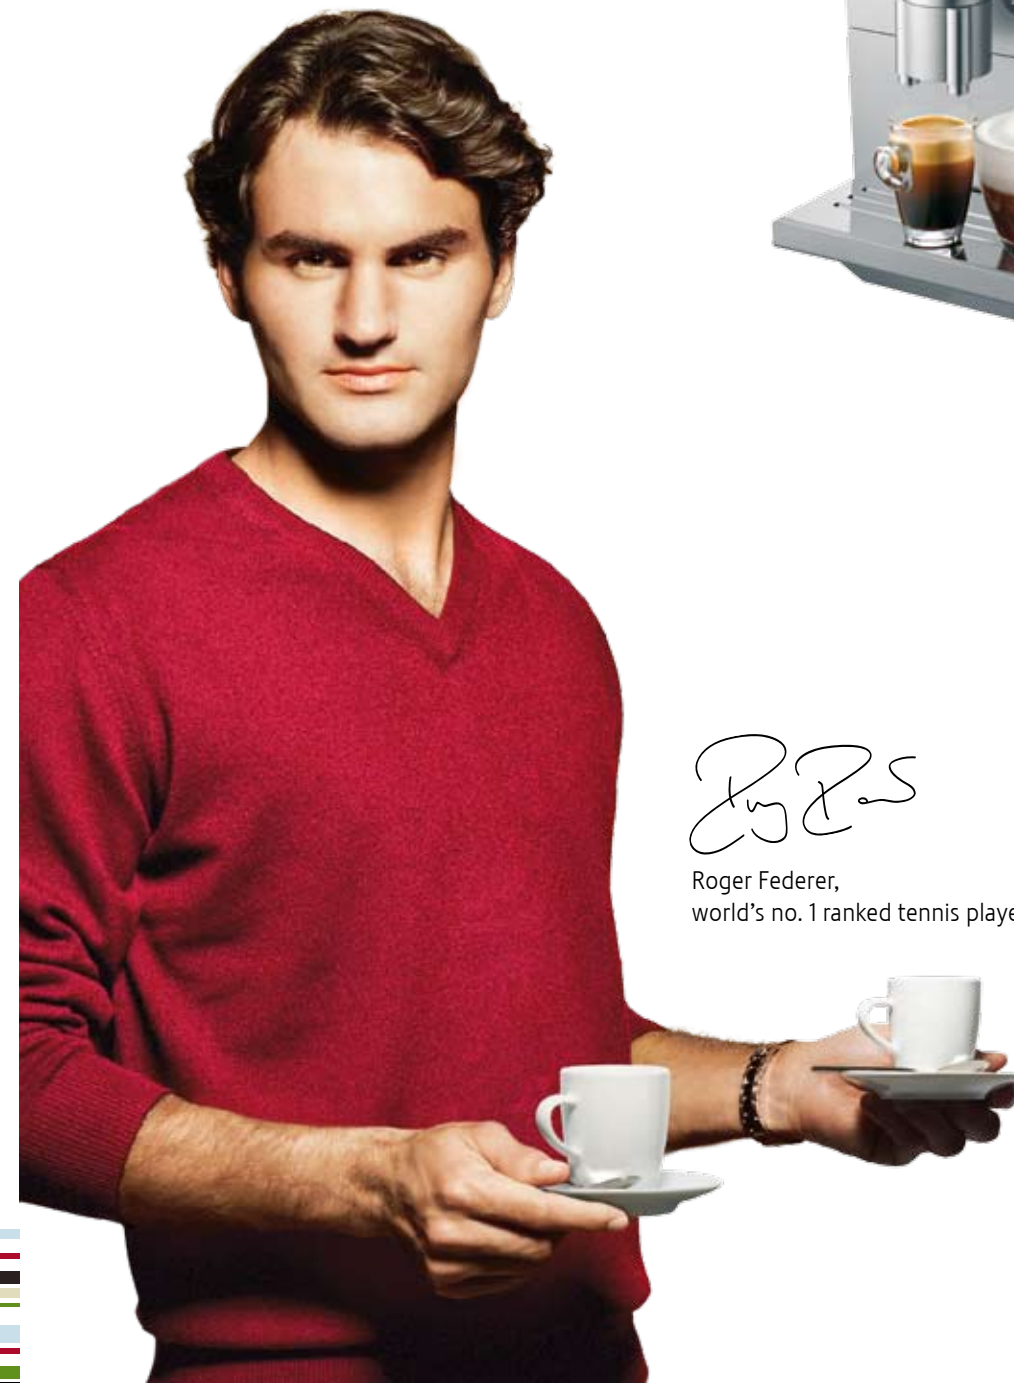

Key technologies		Programming	
Coffee grounds container, (portions)	approx. 10	Programmable switch-off time	■
Connector System®	■	Programmable coffee strength	■
Easy Auto Cappuccino Frother	■	Programmable water quantity for coffee	■
Professional Cappuccino Frother	accessory	Programmable brewing temperature	2 strengths
Two-speed frothing nozzle	accessory		
Separate hot water nozzle	■	Facts	
Rotary Switch	■	Water tank capacity	1.1 l
Three-colour clear text display	■	Bean hopper with aroma preservation cover	125 g
Height-adjustable coffee spout	65–111 mm	Cable length	approx. 1.1 m
Rotating coffee spout	1 cup / 2 cups	Voltage	230 V AC
Powder recognition for second, pre-ground coffee blend	■	Power	1450 W
Adjustable coffee strength	3 settings	Intensity of current	6.3 A
Amount of water adjustable	■	Weight	9.3 kg
Steam/hot water function	■	Dimensions (W x H x D)	23.8 x 36 x 44.5 cm
Energy Save Mode (E.S.M.®)	■	Tests	CE Ⓢ
Milk container	accessory	Swiss made	■
Separate filler funnel for second pre ground coffee	■		

### Key Features

Intelligent Pre Brew Aroma System® (I.P.B.A.S.®)	■
Two cups in a single brewing operation	■
CLARIS plus filter cartridge ENA	■
Variable brewing unit	5–16 g
5-level high-performance conical grinder	■
High-performance pump, 15 bar	■
Thermoblock heating system	■
Additional pre-ground coffee powder	■
Integrated rinsing/cleaning/descaling programme	■
Adjustable water hardness	■
Automatic recognition of filter change	■
Automatic recognition of maintenance programmes	■
Automatic 'replenish beans' display	■
Zero Energy Switch	■

## From the bean to perfection

Mother Nature in person has given us the ideal form of packaging to preserve coffee aroma to perfection: the coffee bean. Locked away inside the bean are over 1000 different flavours, which are released during the brewing process. Freshly ground and extracted coffee is your guarantee for a fabulous aroma.

ENA  
IF YOU LOVE COFFEE

Art. 68124 – 02/08

## The world's slimmest bean-to-cup machine ...

If you want

- the freedom to choose any coffee bean you like
- the genuine flavour of the bean in your cup
- the option to adjust the strength of the coffee to suit your taste
- a product that's environmentally friendly and economical to use (compare the cost per cup with any portion system!)
- a machine that's not only compact but child's play to operate

then look no further. Make ENA, which comes from the Greek meaning number ONE, your first choice!

## Multicolour clear text display

The ENA features a three-colour clear text display. The colours indicate the machine's status and have the following meanings:

### Green

Your ENA is ready to operate and you can make coffee.

### Red

The ENA requires an action from you.

### Yellow

You are in programming mode.

## Coffee spout

Rotating, height-adjustable coffee spout

As a genuine two-cup fully automatic coffee machine, the ENA can prepare either one cup or two cups simultaneously. To guarantee the perfect crema every time, the coffee spout on the ENA<sup>®</sup> can simply be rotated to dispense one cup (Fig. 1) or two cups (Fig. 2), just as you choose. And, as you would expect, the height can be infinitely adjusted between 65 and 111 mm to fit any cup.

## Lively colours

Our passion for fresh, unadulterated enjoyment is also expressed in the ENA colour concept, which transports us to distant, high-lying climes where coffee is cultivated. Here, under a brilliant blue sky (Blue Mountain Sky), the coffee plants flourish and develop their lush, juicy green leaves (Coffee Leaf Green). The snow-white blossoms (Blossom White) mature into coffee berries (Coffee Cherry Red), which are then handpicked, dried and roasted. In the cup, they develop their intoxicating aroma and the mere sight of them awakens a longing for their fresh flavour (Ristretto Black, Espresso Brown) and the soft, velvety crema (Crema).

## Ecological intelligence

### Zero Energy Switch

This innovative piece of technology, registered for patent by JURA, does not interrupt any process already started. Any coffee being made will be finished before the automatic pre-switch-off rinse takes place. Finally, the switch disconnects the machine completely from the mains and the ENA uses no standby energy.

### Energy Save Mode (E.S.M.<sup>®</sup>)

In situations where the ENA is infrequently used, the Energy Save Mode can be switched on to reduce power consumption by up to 40%.
